

Instructions for Commercial and Premier Canopies

Step 1

Use a rubber mallet to ensure that the canopy poles are inserted fully into the fittings.

Step 2

Connect your peak poles and cross brace poles with the 3-way and 4-way fittings. This will make your canopy roof structure.

Step 3

Assemble one section at a time for easiest assembly, starting with the cross bracing poles.

Step 4

Then connect your peak poles using the 3-way and 4-way fittings.

Step 5

Repeat until you have created your roof structure on the ground.

Step 6

Unpack your valance tarp.

Step 7

Place Valance tarp over the canopy roof structure. Make Sure the rope cords are on the ends of the structure not on the sides.

Step 8

Put the ball bungees on the valance tarp attaching it to the structure. Alternate placing the ball bungees from side to side. Pull the rope cords to tighten the tarp over the ends.

Step 9

Fold the valance back on the sides to expose the 3-ways and 4-ways for the leg poles.

Step 10

Prepare your leg poles. Attach the footpads and your T and L brackets.

Step 11

Lift canopy on one side and insert 2 leg poles. This may require 2 or more people, depending on the size and grade.

Step 12

One-by-one insert all the leg poles and base poles.

Step 13

Fold down Valance or full side and attach to base poles

Step 14

Repeat steps 10 through 13 on other side.

Step 15

Place any ball bungees or ties you may have missed. In a few easy steps your canopy is complete.
